<b>Problem</b> A "Delete From Archive" Service is needed to allow the deletion of granules from the archive without removing their meta data - still needed for production history purposes - from the archive. The service will be used, for example, to remove interim files. Granules which have been deleted from the archive need to be flagged ("DeletedFromArchive" flag) to indicate that they are no longer available for ordering. The flag should be visible to scientists so they can exclude granules which have been deleted from their orders.  <u>Need DATE:</u>			
<b>Proposed Solution</b> Add "DeletedFromArchive" to the granule level metadata for the B.0 Implementation of the Earth Science Data Model. The "DeletedFromArchive" attribute is an optional attribute. The datatype is a "date" type with precision capable of one minute resolution (Sybase smalldatetime type).
